SCANDINAVIA

Postal History

Methods and Topics in Postal History: Nordic Mails and Routes (DuBois, ed., 2001; Proceedings of Postal History Symposium at Nordia 2001) Despite the off-putting title, this is an extremely interesting and useful book for cover and cancel collectors and postal historians. Topics: US-Sweden Mail before 1873; Slesvig Plebiscite of 1920; Danish Cancels; Denmark and US Postal Connection 1850-1922; DWI Classic Stamps on Covers; Norwegian Mail During Napoleonic War 1807-1816; Greenland Postal History; Swedish Express Mail 1920-1970; Danish/UN Fieldpost in the Balkans 1992-2001; Swedish Mail to U.S. 1875-1907. Most marks pictured; rarity factors. In French; the primary reference on the subject. Originally issued in 1993 and then in 1998 a supplement was issued. This volume combines both parts into a single volume (at a lower cost). #10044 \$240.00

Folded Typewriter Postcards (Bell, 2008) Subtitled "Effective Economical Commercial Communications — Types, Usages, Rarity, Development, Growth and Decline", this book is a fascinating study of a special type of post cards that were designed to be typed (message AND address) on one side, then the address portion folded and glued to show on the other side. Used primarily in Europe, they were used in the Scandinavian countries; author reports Scandinavian usages as "Scarce" to "Rare". Well written, very interesting, and packed full of useful info on this subject and broader postal history. 115 pages perfect bound, entirely in English and in **FULL COLOR**. Only 200 printed! #10100 \$46.50

Postal History

LOOK! **An Introduction to the Postal History of Denmark 1624-1950** (Cornelius, 2004) To call this massive 344-page, large-format book an "introduction" is misleading. This masterwork provides a wealth of valuable information from which even experienced philatelists will learn much. Entirely in ENGLISH, well-illustrated, hardbound. Well written and enjoyable to read (sometimes unusual in philatelic books). Covering every conceivable aspect of postal history, transport, rates, geo-political postal matters, types of postmarks, all the postal services, and much more. I am told that this is a limited printing of 300 copies. Though costly (high price, small discount, and tremendous shipping cost), this is one book that should be required for every collector of Denmark postal history. Get it soon. #13174 \$99.00

A wide range of forms are listed, including domestic and international parcel envelopes and cards, money orders, COD, giro payment, etc. To non-Danes, many of these forms seem mysterious, but they are an essential part of Danish postal history and cover collecting. Classic Norwegian Literature

Norwegian Handbook 1855-1914 (Anderssen & Dethloff, 1915; Norges Frimerker 1855-1914) The first major handbook of Norwegian stamps. Remarkably good illustrations and very thorough for the era. Edition of only 550. Issued with the Official Reprints of #1, 2-5, and 15 (between pages 24 and 25) mounted on attractive presentation page. Only 550 sets of reprints were issued (2006 Facit Catalog value SEK 4850 = \$675) and are avidly sought after. Original softbound binding was very weak and is now always quite worn. Both the book and the reprints are extremely scarce.

Stamp Mount Cutter This is the mount cutter that we prefer to use in the office and with our personal collections. Made sturdy enough to cut heavy paper, yet highly precise with a sensitive touch. 6.75-inch cutting length with spring-loaded cutting arm to make smooth, even cuts effortlessly. Clear plastic hold-down at the cutting edge is narrow enough to work with very small mounts and wide enough to hold firmly — it can be removed for larger items. Crisp, clean cuts with confidence. The handy slide-out (removable if you wish) storage drawer is terrific for keeping various small mount pieces. We have been using this for a couple of years, but I wish it had existed decades ago! Lower cost than other mount cutters of this size — and I think it is better! #1000016 \$39.00

Fundamentals of Philately (L.N. Williams, 1990 Revised Edition) Hardbound 862-page encyclopedic reference with information for every collector, exhibitor, or dealer, from beginner to specialist. Includes printing, ink, paper, watermarks, gum, perfs, design, etc. Hundreds of illustrations. Back in stock! #1000013 \$59.00

Ultra-Violet (UV) Light (long wave only) Very handy light requires only 4 “AA” batteries (not included). Long-wave UV works for all Scandinavian stamps and most others, but not for U.S. stamps. You can take it anywhere, easily fits in pants pocket or purse. NEVER LOOK INTO THE LIGHT. UV LIGHT CAN DAMAGE EYESIGHT AND ALSO CAUSE “SUNBURN”. #1000003 \$18.95

Instanta Perforation Gauge In my opinion, this is the fastest and accurate perforation gauge there is. Accurate to a tenth of a perforation, with continuous measurement. You simply slide the stamp along until the perfs line up. Clear plastic, thus can be used for stamps on covers too. #1000004 \$9.95

Stamp Tongs High-quality, German-made tongs that we use ourselves. This 12 cm length is easiest to handle for most people. Pointed tip for greatest accuracy, but not the super-sharp tips that tend to cause accidents. #1000009 \$7.75

Watermark Tray Black plastic virtually-unbreakable tray for watermarking your stamps. We do NOT sell watermark fluid. WARNING: Some fluids will damage stamps, including Norway V overprints; you must use a “safe” type. WARNING: WATERMARK FLUID IS DANGEROUS TO YOUR HEALTH — USE ONLY IN WELL-VENTILATED AREA. TAKE CARE. #1000012 \$3.00

Stamp Hinges, pack of 1000 Basic hinges. I am not aware of any hinges currently on the market that I would recommend for mint stamps. However, these hinges are perfectly okay for used stamps. #1000011 \$3.50

Air Mails of Canada 1925-1939 (Arfken & Plomish, 2000; subtitle: The Development and Postal History of National and International Mails) The subtitle says it all; this is an excellent discussion of the airmails of the period and is the only such book that I have seen that addresses the domestic airmails. Well-written and with lots and lots of cover illustrations. Includes a tremendous amount of postal rate information, though one has to dig a little for it. This is best used in conjunction with the Whiteley book. Has a very good index, 230 pages, softbound. Highly recommended. Original publication price was \$65 — this is a super deal. #21006 \$33.95
